Dr.coffee F4

F4 is the first super commercial fully automatic coffee machine for large business premises, with a super stable production efficiency of 600 cups/hour, equipped with 4 independent self-correcting grinding systems and 2 independent brewing systems, as well as QCMS quality monitoring system, strong professional attributes, to cope with the peak hours of business premises.

Made for rush hour

Designed to help us cope with peak business hours, the F4 features four silos, four grinding systems, a dual brewing system, and a professional gyropump, as well as a dual boiler setup of a 5L steam boiler and a 0.7L hot water boiler. These configurations allow the F4 to deliver strong production efficiency while ensuring ultra-high production stability. To the peak hours of business users full of security.

Good quality forever

High-quality coffee, to help users sustainable business. F4 uses 28g super-large capacity infuser to produce more rich taste, and can produce a large cup of high-quality American coffee. Swiss ditting metal flat knife, can discover the best flavor of coffee beans. Professional milk pump, produce more stable at the same time, increase the choice of cold milk drinks, more rapid and accurate speed control to make the whipped milk more mellow.

Smart enough to evolve

F4 is equipped with two smart touch screen, smooth operating system, clear user interface, so that the operation becomes simpler and more efficient. QCMS quality monitoring system can automatically read and calibrate the parameters of the grinding system through the sensor to ensure that the coffee machine is adjusted to the best production state in real time. At the same time, F4 also carries the Internet of Things intelligent use function, automatic cleaning function and milk deficiency monitoring function.

Use details to achieve ingenuity

All-metal body, anti-fingerprint touch screen, coffee bean warehouse origin identification design, two automatic steam rods, F4 both from the appearance of details or functional configuration, in the strong professional attributes at the same time, but also has an excellent experience.

Feature

- 5L large capacity steam boiler ●
- 2 separate steam rods ●
- Quick disassembly of metal brewer ●
- DIY coffee ●
- Coffee milk out same time ●
- Bottled water self-absorption ●
- Tap water supply ●
- Intelligent fully automatic cleaning ●
- IOT System E-Paymnet ○

Technical sheet

Bean hopper capacity (g)	1200*4
Grounds box capacity (g)	2000
Display orientation (Lateral)	8"x 2
Rated voltage (V)	220-240/380
Rated frequency (Hz)	50/60
Rated power (W)	3000/5500
Machine weight (kg)	75
Machine W*D*H (cm)	50*65*76

Capacity

Advised daily output (cups)	600
Hourly output (cups)	260
